New Zealand's leading independent steel building experts - delivering Smart Solutions from concept through to completion.

We pride ourselves on our unwavering commitment to safety, excellence, and responsibility, these three core values drive everything we do.

When you choose SmartSteel Buildings, you choose a partner who shares your values. We are dedicated to delivering outstanding results, fostering a culture of safety, excellence, and responsibility in every project we undertake.

Together, let's build a future that is not only structurally sound but also sustainable and impactful.

Excellent experience. Great communication throughout the process in a very tough time for the building industry with shipping delays and managing costs. SmartSteel were easy to deal with, trustworthy and showed full transparency. The after project follow up was also top level. Highly recommend and when building a shed again will use SmartSteel Buildings.”

Scott Chapman

WE'VE MADE STEEL BUILDINGS SMART!

We are experts in both cold formed and mild steel technology processes. For our cold formed steel buildings we use galvanised steel sections with a 50 year durability guarantee from New Zealand Steel.

Our buildings are value engineered, fully bolted portal frames with options for nested and bird resistant c-purlins and also tophats. Our software provides the most cost-effective solutions with upgrades to have options such as non-obtrusive knee or apex braces and options on purlins and girts. Being fully independent, if a different system exists that can better solve your needs, we'll do everything we can to make it work.

NATIONWIDE CONFIDENCE: OUR TRUSTED STEEL EXPERTS

Our accredited distributor partners are all local, seasoned steel industry professionals. They bring with them decades of experience and knowledge to complement our company-wide innovative systems and software. It's this unique combination of on the ground expertise and market leading project management tools that delivers a service that you can trust.

PROUDLY 100% KIWI OWNED & INDEPENDENT

SmartSteel Buildings proudly stands as an independent, Kiwi-owned company operating in New Zealand. Our unwavering commitment to local solutions means delivering the best designs, the right products, and an experienced local team for every project. True independence grants us the freedom to select the most optimal and cost-effective systems without the constraints of franchised affiliations, exclusive contracts, or recurring fees. At SmartSteel Buildings, we provide the flexibility you need to bring your vision to life.

Build SMART with us!

smartsteelbuildings.co.nz

“We initially researched several shed manufacturers, but when we came across SmartSteel Buildings, we realised there was no comparison with the quality of their product.

Having a structural engineering background, we immediately recognised this company offered a superior product & workmanship, due to their use of fully bolted portal frames, wall girts & purlins, (not TEK screwed), as compared to most of the other companies we sussed out.

We are so thankful for Haemish Reid and his very professional team who built us a magnificent 21x10m shed/workshop, which incorporated their famous soffit wingwall design, that added a handsome stylish finish, to complete our dream build.

Special accolades to SmartSteel, as we were overseas for the whole duration of the build, but that did not daunt the team, who communicated with us and kept us regularly updated with emails and progress photos.

We do not hesitate to recommend SmartSteel Buildings for a hassle-free and rewarding experience.”

Ollie & Bron Logan

MORE SPACE MADE SIMPLE EXTEND YOUR PROPERTY WITH EASE

Now you can add value and functionality to your property with ease. Creating the space that you need, with a high quality result at a cost effective price.

Whether you need extra space for boats, vehicles, tools, animals, or equipment, we offer the solutions, local expertise, and a trusted end-to-end service tailored to enhance your property.

Our designs are always site specific, ensuring we work with the contours, geographical and environmental conditions of the area.

SUN, SNOW, SHAKES, we've got you covered.

“We are very happy with our completed SmartSteel Building. Dealing with the SmartSteel team was a simple process from start to finish. They are honest, trustworthy operators providing expert advice and quality workmanship throughout. There were changes made, we agreed and these were completed straight away. The complete build was project-managed extremely well working in with my other contractors. I would have no hesitation in recommending SmartSteel Buildings to anyone for their future building project.”

BUILT FOR PURPOSE

Our range of commercial and industrial storage options are ideal for use as: industrial storage sheds, warehousing, commercial retail premises and multi-functional buildings.

We offer a wide range of customisation options so you can get the perfect shed for your needs. We also work with you to ensure that your buildings meet all relevant New Zealand building codes and regulations, managing your project from concept through to completion.

At SmartSteel Buildings, we specialise in both cold-formed and mild steel technologies. Our cold-formed steel structures feature galvanised steel sections, backed by a 50-year durability guarantee from New Zealand Steel.

Our buildings showcase **SMART ENGINEERING**, characterised by fully bolted portal frames and flexible options for nested and bird-resistant purlins.

As an independent entity, we are committed to exploring alternative systems that best meet your needs, ensuring we go the extra mile to make them work seamlessly for you.

A big thank you to Haemish and his SmartSteel Team. You were a pleasure to work with, made the process very easy with your professionalism and attention to detail. We highly recommend your product and exceptional service.

We look forward to working with you again.”
